ETHER DIAMOND COIN

EDD

[Whitepaper v.1.0]

Legal Disclaimer

Please read the following contents carefully before participating in the EDD COIN Token Sale. Contributions to the EDD COIN Token Sale are used to further the development of the EDD COIN Project as outlined in this whitepaper (subject to development changes). The EDD COIN Tokens (EDD) are not securities and do not represent any ownership in EDD COIN. The contents of this whitepaper are not used for financial promotions. No entity other than EDD COIN can engage in issuing EDD COIN Tokens and EDD COIN Tokens are intended to operate according to the plan described in the whitepaper (subject to development changes).

In engaging with EDD COIN and the EDD COIN Community, you confirm full understanding and compliance of the following:

1. You acknowledge that EDD COIN Tokens do not constitute securities in any jurisdiction.

2. The contents of this whitepaper are not a financial promotion. Therefore, none of the contents of this whitepaper serve as an invitation or inducement to engage in any sort of investment activity.

3. You acknowledge that the contents of this whitepaper, the undertaking of EDD COIN Token Sale, and/or the trading of EDD COIN Tokens, should not be interpreted by you as an indication of the merits of EDD COIN, including but not limited to, the EDD COIN Tokens, the EDD COIN Token Sale, the EDD COIN Card, the EDD COIN Wallet and the EDD COIN Exchange.

4. You are fully aware of and understand that you are not eligible to participate in the EDD Coin Token Sale if you are a citizen, resident (tax or otherwise), or green card holder of countries where Token Sales are restricted (such as, but not limited to: the United States of America, Singapore, China, and South Korea).

5. You acknowledge that any information contained in this whitepaper and any current or future communication from EDD Coin and its members, should not be construed as a guarantee of profit or benefit in any form, regardless of the time of their occurrence.

6. You acknowledge that there may be known and unknown risks associated with crypto currencies, such as heavy fluctuations of crypto currency values, innate risks in the crypto currency industry, which may result in financial losses. You agree that you understand the risks and are able to bear potential losses in full.

7. You acknowledge that there are risks associated with EDD Coin and its respective business and operations, the EDD Coin Tokens, the EDD Coin Token Sale, and the EDD Coin Ecosystem.

8. You acknowledge that the EDD Coin Ecosystem is currently being developed and may undergo significant changes before release.

9. You acknowledge that EDD Coin may send you emails from time to time, but these email notices will not ask for confidential information from you. You should not respond to any suspicious and unofficial inquiries regarding EDD Coin Tokens in order to reduce the possibility of fraud, phishing attempts, and other schemes perpetrated by malicious third parties.

10. You acknowledge that EDD Coin does not warrant the period of time for which the EDD Coin Ecosystem will be operational. The EDD Coin Ecosystem may be abandoned for a number of reasons, including a lack of interest from the public and a lack of funding to develop solutions.

11. After participating in the EDD Coin Token Sale, you will become a EDD Coin Token Holder. EDD Coin Token Holders will never own any securities or any interest in EDD Coin.

12. To participate in the EDD Coin Token Sale, the contributor needs to confirm that he/she:

-Is legally permitted to purchase or possess tokens in the contributor's jurisdiction. -Is of a sufficient age and capability to legally purchase or possess EDD Coin Tokens. -Will take sole responsibility for any restrictions and risks associated with the purchase of EDD Coin Tokens.

-Has a full and complete understanding of the usage, intricacies, and risk of block chain based assets.

1. Introduction:

Cryptocurrency, specifically Blockchain, has been proven to be a groundbreaking technology in society today, yet it is still in the early stages of adoption. Consequently, many new cryptocurrency concepts are being marketed to bridge the gap between technical complexity and usability of Blockchain. We at Ether Diamond want to blend both the blockchain technology and smart contract. Blockchain provides proof of transparency and smart contract provides proof of ownership.

At **EDD**, we are group of enthusiast and developers who want to use the best of both technologies (ie: Blockchain and smart contract) we want to apply the principle of **Anonymity and Decentralisation** along with **Smart Contracts.**

The potential in this growing market along with increasing acceptance of cryptocurrencies makes new projects extremely appealing for start-ups and investors alike. The market for cryptocurrencies is not fully realized.

2. What is Crypto Currency:

Cryptocurrency is electronic money created with technology controlling its creation and protecting transactions, while hiding the identities of its users.
Crypto- is short for "cryptography", and cryptography is computer technology used for security, hiding information, identities and more. *Currency* simply means "money currently in use".

Cryptocurrencies are a digital cash designed to be quicker, cheaper and more reliable than our regular government issued money. Instead of trusting a government to create your money and banks to store, send and receive it, users transact directly with each other and store their money themselves. Because people can send money directly without a middleman, transactions are usually very affordable and fast.

3. What is ERC20 Token:

Ethereum Token (ERC20) is a token used on Ethereum Smart contracts, any Ethereum Tokens (ERC20) are suppose to follow a set of rules. Also the smart contract tokens (ERC20) issued on Ethereum gives developer the ability to program how the new token issued will work on the Ethereum Ecosystem,(ie: Number of tokens and so on)

4. What is EDD:

Ether Diamond is **ERC20 Token** issued on Ethereum Smart contract and blockchain technology using the value of Diamond. At EDD we want to open the doors to store multiple major crypto currencies(ie: Bitcoin, Ethereum, Litecoin and so on) on our web wallet and Mobile Application. Also we plan to launch EDD Visa card that can be used to withdraw cash and make purchases at all the locations where Visa card is accepted. We want to give the power to the users in the form on **Decentralisation.**

5. Why EDD:

Ether Diamond uses both smart contact and Blockchain technology, whereby making the transaction faster and cheaper, since the token is issued on Ethereum it prevents the lost of transactions or any delays in transaction. Also EDD will be first of its kind to use both Anonymity and smart contract technology.

6. Objectives of EDD:

  ➢ To speed up the transaction
  ➢ To use both block chain technology and Smart contract
  ➢ Listing on Exchanges
  ➢ Create an exchange platform to convert Crypto currencies to Fiat currencies and vice-versa
  ➢ Mobile Applications for Android and IOS
  ➢ Launch EDD Visa card

7. Road Map:

  ➢ Project inception April 2018
  ➢ Team Formation June 2018

- Begin Development July 2018
- Legal setup August 2018
- Token Creation September 2018
- Listing on Exchanges after token sale ends February 2019
- Launch of Mobile Application April 2019
- Exchange Platform to convert Crypto currencies into fiat and vice versa August 2019
- Launch EDD Visa Card November 2019
